At Horizon, we strive to make a powerful difference for patients, their caregivers and clinicians every day.

Founded in 2008 as a startup with only a handful of employees and no office space, Horizon is now a global biotechnology company dedicated to transforming the lives of people impacted by rare, autoimmune and severe inflammatory diseases. Though we’ve grown, our patient-focused culture is no different today than it was when we started.

You have our commitment to do our best to better the lives of those living with cystinosis, today and into the future.

**Our Dedication to People Living with Cystinosis**

With support built around the patient, we serve as a partner in their journey, providing each person with access to a range of programs and resources.

Financial assistance in place so that, where eligible, cost is not a barrier for patients to receive our medicines¹

Dedicated one-on-one support throughout the treatment journey from Patient Access Liaisons (PALs) that work directly with patients to provide non-medical, logistical assistance²

Connection to resources that may help with access to white blood cell (WBC) cystine testing, travel to see a specialist, education and support navigating school, work and life’s transitions

**Our Support and Engagement with the Community**

Through our engagement with the cystinosis community, we go well beyond providing therapies to deliver resources that help address the needs of those living with cystinosis.

**40+** Horizon-hosted virtual events in 2021 that brought people living with cystinosis together to learn and connect

**50+** Industry patient advocacy groups supported globally including leading cystinosis and kidney advocacy organizations

**50+** Rare disease events sponsored and attended each year by Horizon employees

**Our Commitment to Research and Development**

We embrace our responsibility to continually discover and deliver new solutions for people living with rare and rheumatic diseases, partly through collaborations with leading industry experts and organizations.

Addressing challenges of managing multiple, different medications, leading to the development of a new form of administering our medicine for cystinosis in 2020

by supporting **18 research projects** led by academic institutions

through a **$3 million gift** to Children’s National Rare Disease Institute

¹ Assumes utilization of Horizon Therapeutics financial support programs

² Available to those prescribed with a Horizon medicine and have opted into the support
Cystinosis Support and Services

As part of our mission, we strive to improve the experience of living with a rare disease, including through support of many organizations that provide crucial programs and services for people living with cystinosis and other rare diseases.

Financial Support

National Organization for Rare Disorders (NORD)

Co-pay Program* assists eligible individuals who have health insurance to cover health insurance deductibles, copayments and coinsurance costs associated with the care of cystinosis

Medical Assistance Program* assists eligible individuals who are uninsured or for whom coverage has been denied, with out-of-pocket costs for medical expenses

Emergency Relief Program* supports eligible individuals and/or families who need financial support when faced with limited resources to pay for unexpected or emergency non-medical expenses

For information about each of the above programs, send an email to NORD at Cystinosis@RareDiseases.org.

*costs for medications are not eligible for NORD programs

The Assistance Fund | TAFCare.org

The Assistance Fund is an independent charitable patient assistance organization that provides support for adults and children with rare and chronic diseases. The organization may help provide families with financial and travel assistance.

Good Days | MyGoodDays.org

Good Days works to improve the health and quality of life of patients with chronic disease, cancer, or other life-altering conditions. The organization may help provide families with financial and travel assistance.
