

Before deciding if you will participate in a clinical trial, it's important to have a good understanding of the trial's goals, eligibility criteria, the potential benefits and risks of the experimental medicine and your responsibilities. This sheet provides questions you may want to ask your doctor and clinical trial research team to help you make an informed decision about joining the trial.

1

Can you tell me about the trial and its purpose?

Can you tell me more about the experimental medicine being tested?

How could this trial help me if I join?

2

Is this trial a good fit for me? YES NO

How do I know if I qualify?

How long is the trial?

Where will I go for study visits?

What will be required of me if I participate?

What types of tests and/or exams will I receive if I join the trial?

3

What are the risks associated with joining the trial?

What are the side effects of the experimental medicine?

What is the current standard treatment and how do the side effects of the experimental medicine compare to it?

4

Will I miss out on receiving other important care if I join? YES NO

5

How will my medical information and privacy be protected?

6

What happens once the trial is over?

7

Will I receive compensation for participating in the trial? YES NO

Will participating in the trial cost me anything?

Will my health insurance pay medical expenses related to the trial?

8

If I have questions about the trial, whom do I contact?

9

How do I apply if I would like to join?
